Exposure Measure:	Index	Index	Index	Index	Index	Index	Index	Index	Index	Index	Index	Index	Index	Index	Index	
PARAMETERS																
County FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Date of Survey FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes

*Note:* \* p <.10, \*\* p <.05, \*\*\* p <.01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windswath, and storm surge. Age and political ideology are z-standardized. Estimates are scaled using sampling weights.

Table D-2: Equivalence Test

Parameter	(1) Estimate	(2) % in Range of Practical Equivalence
Republican	0.060*** [0.003, 0.116]	100
Democrat	-0.037*** [-0.095, 0.021]	100
Woman	0.024*** [-0.033, 0.081]	100
High School Graduate	0.066*** [0.009, 0.123]	100
College Graduate	-0.041*** [-0.102, 0.020]	100
Age	0.040*** [0.011, 0.069]	100
Political Ideology	-0.035*** [-0.062, -0.008]	100
White	0.093** [0.026, 0.161]	92
Black	-0.008*** [-0.093, 0.078]	100
Latinx	-0.079** [-0.152, -0.005]	99
Employed	-0.102** [-0.158, -0.045]	93
Native Born	0.156 [0.058, 0.253]	47
Religiosity	-0.004*** [-0.021, 0.013]	100
Empathy	-0.004*** [-0.033, 0.024]	100
Political Interest	0.009*** [-0.022, 0.039]	100
Observations:	2563	
Exposure Measure:	Index	
PARAMETERS		
State FE	Yes	
Date of Survey FE	Yes	

*Note:* \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, 95% confidence intervals are in brackets. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windswath, and storm surge. Age and political ideology are z-standardized. Estimates are scaled using sampling weights.

# Validating the Hurricane Exposure Measure

Table D-3: Hurricane Exposure and Self-Reported Experience of Hurricanes

	Personally Experienced a Hurricane in Past Year (=1)				Community Experienced a Hurricane in Past Year (=1)			
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Hurricane Exposure x Post	0.161*** (0.028)	0.191*** (0.016)	0.239*** (0.077)	0.107*** (0.016)	0.191*** (0.024)	0.215*** (0.018)	0.312*** (0.082)	0.130*** (0.013)

Exposure Measure:	Index	Windswath	Storm Surge	FEMA Aid	Index	Windswath	Storm Surge	FEMA Aid
PARAMETERS								
County FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Date of Survey FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Note: \* p <.10, \*\* p <.05, \*\*\* p <.01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. In columns 1 and 5, exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windswath, and storm surge. In columns 2 and 6, exposure is an ordinal measure with four values denoting the maximum sustained winds endured in a county during Hurricane Ian: sub-cyclonic winds (0-33 knots), tropical storm-force winds (34-49 knots), violent gale-force winds (50-63 knots), and hurricane-force winds (≥ 64 knots). In columns 3 and 7, exposure is an indicator for counties that experienced Hurricane Ian-induced storm surge (≥ 1 foot). In columns 4 and 8, exposure is an ordinal measure with five values denoting the categories of FEMA disaster assistance available to Hurricane Ian victims in a county: none, Category B public assistance only, Categories A-G public assistance only, individual assistance and Category B public assistance, and individual assistance and Categories A-G public assistance. Estimates are scaled using sampling weights.

Table D-4: Hurricane Exposure and Self-Reported Experience of Other Climatic Disasters

	Personally Experienced Extreme Weather in Past Year (=1)

County FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Date of Survey FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Note: \* p <.10, \*\* p <.05, \*\*\* p <.01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. In columns 1 and 5, exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, winds swath, and storm surge. In columns 2 and 6, exposure is an ordinal measure with four values denoting the maximum sustained winds endured in a county during Hurricane Ian: sub-cyclonic winds (0-33 knots), tropical storm-force winds (34-49 knots), violent gale-force winds (50-63 knots), and hurricane-force winds (≥ 64 knots). In columns 3 and 7, exposure is an indicator for counties that experienced Hurricane Ian-induced storm surge (≥ 1 foot). In columns 4 and 8, exposure is an ordinal measure with five values denoting the categories of FEMA disaster assistance available to Hurricane Ian victims in a county: none, Category B public assistance only, Categories A-G public assistance only, individual assistance and Category B public assistance, and individual assistance and Categories A-G public assistance. Estimates are scaled using sampling weights.

Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. In columns 1 and 5, exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windswath, and storm surge. In columns 2 and 6, exposure is an ordinal measure with four values denoting the maximum sustained winds endured in a county during Hurricane Ian: sub-cyclonic winds (0-33 knots), tropical storm-force winds (34-49 knots), violent gale-force winds (50-63 knots), and hurricane-force winds (≥ 64 knots). In columns 3 and 7, exposure is an indicator for counties that experienced Hurricane Ian-induced storm surge (≥ 1 foot). In columns 4 and 8, exposure is an ordinal measure with five values denoting the categories of FEMA disaster assistance available to Hurricane Ian victims in a county: none, Category B public assistance only, Categories A-G public assistance only, individual assistance and Category B public assistance, and individual assistance and Categories A-G public assistance. Estimates are scaled using sampling weights.

Exposure Measure:	Index	Index	Index	Index	Index	Index	Index
PARAMETERS							
County FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Date of Survey FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Republican Voteshare x Date of Survey	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Migration x Date of Survey	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Pre-Hurricane Traffic x Date of Survey	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Note: \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, winds swath, and storm surge. Demographic covariates are partisanship, education, gender, and age. Republican voteshare is the Republican voteshare in the 2020 Presidential election. Migration represents two county-level variables measured in 2021—the internal and international net migration rates. Pre-hurricane traffic is the number of population-normalized, hurricane evacuation-related traffic hazards in the three days before Hurricane Ian made landfall. Estimates are scaled using sampling weights.

# Hurricane Ida Placebo

Table D-29: Hurricane Exposure and Climate Attitudes in Hurricane Ida-Exposed Counties

County FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Date of Survey FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Note: \* p <.10, \*\* p <.05, \*\*\* p <.01. Robust, county-clustered standard errors are in parentheses. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windswath, and storm surge. Estimates are scaled using sampling weights. All effects are estimated relative to respondents residing 500-1000 miles from the Hurricane Ian eyepath.

Note: \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windsweath, and storm surge. Estimates show the effect of Hurricane Exposure x Post in sub-samples defined by the respective trait denoted in the table. Estimates are scaled using sampling weights.

Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyewall, windward, and storm surge. Estimates show the effect of Hurricane Exposure x Post in sub-samples defined by the respective trait denoted in the table. Estimates are scaled using sampling weights.

Note: \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyewall, windswept, and storm surge. Estimates show the effect of Hurricane Exposure x Post in sub-samples defined by the respective trait denoted in the table. Estimates are scaled using sampling weights.

Exposure Measure:	Index	Index	Index	Index	Index	Index	Index
PARAMETERS							
County FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Date of Survey FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Note: \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, county-clustered standard errors are in parentheses. Post is an indicator for all dates on or after September 28, 2022, when Hurricane Ian made landfall in the United States. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyepath, windswath, and storm surge. Estimates are scaled using sampling weights.

Note: \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, county-clustered standard errors are in parentheses. Only follow-up survey responses are used in these analyses. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyewall, winds swath, and storm surge. Estimates show the effect of Hurricane Exposure in sub-samples defined by the respective trait denoted in the panel title. Estimates are scaled using sampling weights.

Note: \* p < .10, \*\* p < .05, \*\*\* p < .01. Robust, county-clustered standard errors are in parentheses. Only follow-up survey responses are used in these analyses. Exposure is a continuous, z-standardized index combining information on Hurricane Ian's eyewall, windswept, and storm surge. Estimates show the effect of Hurricane Exposure in sub-samples defined by the respective trait denoted in the panel title. Estimates are scaled using sampling weights.
